#COLORS

COLOR STUDIO SPECIAL

For the first time, Porcelaingres opens the doors to colour, refined and soft hues inspired by natural elements, and which at the same time perfectly fit in with other materials in the range.

Naturally desaturated, the 8 colours in the collection create a true colour system that lets you coordinate shades in different ways, as the warm and cold nuances complement each other perfectly, without looking forced. The textured and matt surface also comes to life in the light, with a soft glow that livens the material, making it unique and unconventional.

Erstmals eröffnet Porcelaingres der Farbe die Türen, einer angenehmen, zarten Farbe, die an den natürlichen Elementen inspiriert ist und gleichzeitig perfekt zu den anderen Materialien der Produktpalette passt.

Die 8 natürlich entsättigten Farben der Kollektion schaffen ein wahres Farbsystem, das die Kombination der Farbtöne untereinander nach verschiedenen Modalitäten ermöglicht, weil die warmen und kalten Nuancen auf natürliche Weise perfekt zueinander passen. Die materische, matte Textur wird außerdem durch das Licht mit einem leichten Schimmern mit Leben gefüllt, das die Materie auffrischt und einzigartig und unkonventionell macht.

Per la prima volta Porcelaingres apre le porte al colore, un colore garbato e tenue che si ispira agli elementi naturali e che al contempo si integra alla perfezione con altri materiali della gamma.

Naturalmente desaturati gli 8 colori della collezione creano un vero e proprio sistema cromatico che consente di abbinare le tinte tra loro secondo diverse modalità, poiché le nuances calde e fredde si sposano perfettamente tra loro, senza forzatura alcuna. La texture materica e opaca inoltre si anima alla luce con un lieve brillio, che ravviva la materia e la rende unica e non convenzionale.

Pour la première fois, Porcelaingres ouvre ses portes à la couleur, une couleur douce et subtile qui s'inspire des éléments naturels et s'intègre aussi parfaitement avec les autres matériaux de la gamme.

Naturellement désaturées, les 8 couleurs de la collection créent un véritable système chromatique qui permet de combiner les teintes entre elles de différentes manières, puisque les nuances chaudes et froides se marient parfaitement les unes aux autres, sans forcer. La texture matérielle et opaque prend également vie dans la lumière avec un léger éclat, qui ravive le matériau et le rend unique et non conventionnel.

Por primera vez, Porcelaingres abre sus puertas al color: un color delicado y tenue que se inspira en los elementos naturales a la vez que se integra perfectamente con otros materiales de la gama.

Naturalmente desaturados, los 8 colores de la colección crean un auténtico sistema cromático que permite combinar los colores de diferentes maneras, ya que las tonalidades cálidas y frías armonizan perfectamente sin forzamiento alguno. La textura opaca se anima al recibir la luz, con un ligero brillo que reaviva la materia y la convierte en algo único y no convencional.

The background features a light beige, textured surface with several large, thin black outlines forming geometric shapes. On the left, there's a vertical rectangle divided into four horizontal sections by three lines. To its right is a large, irregular polygon with a Y-shaped cutout. Below these are two more irregular polygons, one tilted upwards and another tilted downwards. The overall aesthetic is minimalist and architectural.

COLOR STUDIO SPECIAL

The company is proposing a hand-made cut design to emphasize the mixing & matching among the various colours: squares, triangles, diamonds, rhombuses, trapezoids, mosaics and strips of different sizes constitutes the basic ingredients, which come together to create more or less complex patterns and entirely original effects.

Das Unternehmen designt ein Projekt von Formen, die von Hand gefertigt werden, um den Mix & Match-Effekt zwischen den verschiedenen Farben hervorzuheben: Quadrate, Dreiecke, Rauten, Trapeze, Mosaiken und Leisten unterschiedlicher Größe sind die Grundbausteine, die sich zu mehr oder weniger komplexen Mustern mit stets unterschiedlichen Effekten kombinieren lassen.

L'azienda propone un progetto di tagli, realizzati artigianalmente, per enfatizzare il mix & mach tra i diversi colori: quadrati, triangoli, losanghe, rombi, trapezi, mosaici e listelli di diverse dimensioni sono gli ingredienti base che si combinano per creare pattern più o meno complessi ed effetti sempre diversi.

La société propose un projet de coupes, réalisées de manière artisanale, pour emphatiser le mix & match entre les différentes couleurs: les carrés, les triangles, les losanges, les trapèzes, les mosaïques et les bandes de différentes tailles sont les ingrédients de base qui sont combinés pour créer des motifs plus ou moins complexes et des effets toujours différents.

La empresa propone un proyecto de cortes, hechos artesanalmente, para enfatizar la mezcla y combinación de diferentes colores: cuadrados, triángulos, losanges, rombos, trapecios, mosaicos y listones de diversos tamaños son los ingredientes básicos que se combinan para crear patrones más o menos complejos y efectos siempre distintos.

5 different shapes and 4 types of mosaics to tell the story of the innovative Color Studio collection by Porcelaingres.

5 verschiedene Formen und 4 Arten von Mosaiken, um die Geschichte der innovativen Color Studio Kollektion von Porcelaingres zu erzählen.

5 Forme differenti e 4 tipologie di mosaici per raccontare l'innovativa collezione Color Studio by Porcelaingres.

5 formes différentes et 4 types de mosaïques pour raconter la collection innovante Color Studio by Porcelaingres.

5 formas diferentes y 4 tipos de mosaicos para contar ilustrar la innovadora colección Color Studio by Porcelaingres.

In addition to the variety of colours, the 45° cut of the square, the triangle and the diamond allow these three shapes to be combined in order to create numerous possible interpretations, just as the rhombus and the trapezoid cut at 60° can be combined to tell other stories.

Der 45°-Schliff des Quadrates, des Dreiecks und des Trapezes ermöglicht es, diese drei Formen miteinander zu kombinieren. Zusammen mit der farbliche Vielfalt können so zahlreiche Varianten gestaltet werden, wie z. B. Rauten und Trapeze, die mit einem 60° Schliff harmonisch aneinandergfügt werden können.

Il taglio a 45° del quadrato del triangolo e della losanga consente di abbinare queste tre forme tra loro permettendo, insieme alla varietà cromatica, di generare numerose possibili interpretazioni, così come il rombo e il trapezio, tagliati a 60° possono combinarsi tra loro e raccontare altre storie.

La coupe à 45° du carré, du triangle et du losange permet de combiner ces trois formes entre elles en permettant, avec la variété de couleurs, de générer de nombreuses interprétations possibles, tout comme le losange et le trapèze, coupés à 60°, peuvent se combiner entre eux et raconter d'autres histoires.

El corte a 45° del cuadrado, del triángulo y del losange permite combinar estas tres formas ofreciendo variedad cromática y la posibilidad de generar numerosas interpretaciones, mientras que el rombo y el trapecio, cortados a 60°, se pueden combinar entre sí y contar otras historias.

The patterns generated by these combinations are classified as either regular or random. The regular ones are based on repeated decorative units that always create different geometries, while the random ones are more free and emotional combinations, and are rendered possible thanks to the consistency of the collection's 8 nuances, which are perfectly balanced and can be effortlessly combined.

Die Muster, die durch diese Kombinationen entstehen, werden in reguläre oder zufällige Muster unterteilt. Die regulären Muster beruhen auf sich wiederholende, dekorative Einheiten, die sich zu verschiedenen Geometrien fügen. Die zufälligen Muster hingegen zeichnen sich durch freie und emotionale Kombinationen aus, die dank der 8 Farbnuancen der Kollektion harmonisch und natürlich zusammenpassen.

I pattern generati da queste combinazioni si suddividono in regolari o random, quelli regolari si basano su unità decorative ripetute che disegnano geometrie sempre diverse, quelli random sono combinazioni più libere ed emozionali rese possibili dalla coerenza delle 8 nuance di collezione che si abbinano tra loro con grande equilibrio, senza forzature.

Les motifs générés par ces combinaisons sont subdivisés en réguliers ou aléatoires, ceux réguliers se basent sur des unités décoratives répétées qui dessinent des géométries toujours différentes, ceux aléatoires sont des combinaisons plus libres et émotionnelles rendues possibles par la cohérence des 8 nuances de collection qui sont combinées entre elles avec un grand équilibre, sans forçage.

Los patrones generados por estas combinaciones se dividen en regulares o aleatorios: los regulares se basan en unidades decorativas repetidas que dibujan geometrías siempre diferentes, mientras que los aleatorios son combinaciones más libres y emocionales que resultan posibles gracias a la coherencia de las 8 tonalidades de la colección, que armonizan entre sí con gran equilibrio y sin esfuerzo.

GROUT & MOSAICS

**THE STRIPES
LAYOUT
OF GROUT**

Even the grout have been integrated within the Porcelaingres colour project: designed to be in tone with the collection, they can be used in conjunction with the base, or else as a contrast, in order to delineate and highlight the special pieces used for the flooring and cladding.

Sogar die Fugenmassen werden Teil des Farbprojekts von Porcelaingres: sie wurden im Einklang mit der Kollektion konzipiert, sodass sie passend zur Grundfarbe oder als Kontrast verwendet werden können, um die Formteile der Kollektion, die am Boden oder als Verkleidung verwendet werden, besonders hervorzuheben.

Anche gli stucchi entrano a far parte del progetto colore di Porcelaingres: studiati a tono con la collezione possono essere usati in abbinamento al fondo o a contrasto per disegnare e ed enfatizzare i pezzi speciali utilizzati a pavimento e a rivestimento.

Les enduits font également partie du projet couleur de Porcelaingres: étudiés ton sur ton avec la collection, ils peuvent être utilisés en combinaison avec la surface ou en contraste pour dessiner et emphatiser les pièces spéciales utilisées sur le sol et le mur.

Incluso los mastiques se convierten en parte del proyecto de color de Porcelaingres: diseñados a tono con la colección, se pueden usar en combinación o en contraste con el fondo para diseñar y enfatizar las piezas especiales utilizadas como pavimento y revestimiento.

MAPEI:
Ultracolor Plus Kerapoxy
White 100

Porcelaingres does not make or sell grout. We merely offer advice on which readily-available products to use.

Fugenmassen werden von Porcelaingres weder produziert noch vertrieben. Das Unternehmen empfiehlt lediglich die Kombination mit anderen bereits im Handel erhältlichen Produkten.

Porcelaingres non produce né commercializza stucchi, ma suggerisce l'abbbinamento con prodotti già in commercio.

Porcelaingres ne produit pas et ne vend pas de plâtre, mais suggère de le combiner avec des produits déjà commercialisés.

Porcelaingres no produce ni comercializa estucos, pero sugiere una combinación con productos que ya están en el mercado.
